

Renowned ingredients take wrinkle reduction to the next level!

- A derm-inspired, solution-specific boost for skin
- Scientifically proven ingredients improve the look of lines and wrinkles

Break through to your best skin with potent, patent-pending Mary Kay Clinical Solutions™ Boosters designed to complement your existing skin care routine.

POWER STATEMENT:

Renowned ingredients take wrinkle reduction to the next level

Over time, we lose the ability to produce skin's critical proteins collagen and elastin due to natural aging, sun exposure and other environmental stressors. These factors, along with repetitive facial movements, lead to the inevitable formation of lines and wrinkles. The answer? Support skin and target critical components of skin aging with a boost of vitamin C, resveratrol, and acetyl hexapeptide-8.

Vitamin C (ascorbic acid)

- Vitamin C supports skin's natural production of collagen and elastin proteins to help improve the look of fine lines and wrinkles.
- A strong antioxidant, it protects* against the harmful effects of UV- and pollution-induced free radicals on the skin, which can contribute to premature lines and wrinkles.
- And it's clinically shown to improve the appearance of lines and wrinkles caused by photodamage.

Resveratrol

- Resveratrol supports skin's natural production of collagen and elastin proteins and helps defend against collagen breakdown.
- It also helps protect* against photodamage, which can contribute to premature lines and wrinkles.

Acetyl Hexapeptide-8

- Acetyl hexapeptide-8 helps diminish signals that over time lead to lines and wrinkles

*Based on in vitro testing

Application Instructions

Use up to twice a day. A slight sensation may be noticed. For best results, use within 6 months after opening, and store in a cool, dark place. Can be layered with Clinical Solutions™ HA + Ceramide Hydrator. Can be used with Clinical Solutions™ Retinol 0.5 after completing the retinization protocol.
